	Average return each year	10.2%	7.3%	6.4%

The table shows the money you could get back over the next 5 years, under different scenarios, assuming that you invest £10,000. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the product. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The figures shown include all the costs of the product, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

## What happens if SQN Capital Management, LLC is unable to pay out?

As a shareholder in the product, you would not be able to make a claim to Financial Services Compensation Scheme nor any other compensation body about the product in the event that the manufacturer is unable to pay out.

## What are the costs?

The Reduction in Yield (RIY) shows the impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, recurring and incidental costs.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential exit penalties. The figures assume you invest £10,000. The figures are estimates and may change in the future.

**Table 1: Costs over time**

The person selling you or advising you on this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Investment Scenarios (£10,000)	If you cash in after 1 year	If you cash in after 3 years	If you cash in after 5 years
<b>Total costs</b>	<b>£223</b>	<b>£669</b>	<b>£1,116</b>
Impact on the return (RIY) per year	2.23%	2.04%	1.88%

**Table 2: Composition of costs**

The table below shows:

- The impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period.
- The meaning of the different cost categories.

One-off costs	Entry charge	N/A	The impact of the costs you pay when entering your investment.
	Exit charge	N/A	The impact of the costs of exiting your investment when it matures.
Recurring costs	Portfolio transaction costs	0.11%	The impact of costs of us buying and selling underlying investments for the product.
	Other ongoing costs	2.12%	The impact of the costs that we take each year for managing your investments.
Incidental costs	Performance / other incidental fees	N/A	This product does not have any performance or other incidental fees.
